Hannon Westwood's 27th Round Screening Study

saves time and manpower by providing geotechnical data and previous mapping

The Study offers first-pass screening to grade opportunities for further detailed work and enables explorers and business managers to focus efforts where most appropriate

The Report

Provides a listing and technical descriptions of undrilled prospects and undeveloped discoveries now in open acreage

Also available in separate editions:-

CNS prospects	- 939 prospects
NNS prospects	- 103 prospects
SNS prospects	- 256 prospects
WOB/WOS prospects	- 105 prospects
Discoveries	- 107 discoveries

- Lists previously mapped prospects and discoveries now in open acreage
- Provides technical descriptions of prospects and discoveries
- Includes abandoned field summaries and map files

Update

Following the Round announcement, Hannon Westwood has prepared a supplementary study describing blocks not covered in the pre-announcement report.

Please contact us for prices of the full
27th ROUND SCREENING STUDY (including update),
area editions and the workshop

Workshop

Review your selection of opportunities with Hannon Westwood geoscientists. Use a concentrated working session to focus and save time.
